

**A SUMMARY OF
ELECTRIC SERVICES
AND
ASSOCIATED FEES**

CENTRAL GEORGIA EMC
An Electric Membership Corporation
Owned by Those We Serve

CENTRAL GEORGIA EMC

SERVICE FEES

The following fees will be charged for the following services:

1. Membership.....\$5.00
2. Meter Test.....\$25.00
A fee of \$25.00 will be charged for requested meter tests. If the meter is found faulty and does not meet the accepted standard percentage, the Meter Test Fee of \$25.00 is returned and the customer's bill is adjusted. This bill adjustment will be retroactive for the three preceding months. If the meter test shows that the member was not charged enough for electricity, then the three months' adjustments will be made in favor of the Cooperative.
3. Overtime Charge.....\$30.00
Overtime is charged in addition to other necessary fees and charges for any services rendered between the hours of 4:30 p.m. and 8:00 a.m., Monday through Friday, all day on Saturdays and Sundays, and on legal holidays other than for outages caused by trouble on distribution equipment. The Overtime Charge will be \$30.00 in addition to the other fees and service charges.
4. Account Establishment Charge.....\$20.00
To process a customer account, to determine the beginning meter reading for a customer account, or to set a meter during normal working hours, the Account Establishment Charge shall be \$20.00. New construction will not require an Account Establishment Charge.
5. Service Charge.....\$20.00
A fee will be charged to cover the cost of each trip to the customer's premises for delinquent payments, cut-off or collection of returned checks, or default by customer in keeping prearranged agreements.
6. Prepayment Charge - Residential.....see below
In addition to the other required charges and fees, a prepayment or deposit may be required. A credit rating agency is used to assist in determining the amount of deposit required. Deposits range from \$100 up to \$300 or more for residential customers. The deposit amount is dependent upon the results of the credit score. If a deposit is required, the amount is refunded (credited to account) after twelve months, provided a good credit history has been established and no open contracts are on the account.
7. Prepayment Charge - Commercial.....see below
In addition to the other required fees and charges, a Prepayment Charge of an estimated bill of up to ninety (90) days may be collected from the customer. In lieu of Prepayment Charge, the customer may furnish a Personal Guaranty for any unpaid or outstanding balance for the account. Any Prepayment Charge is refundable when the account is terminated.
8. Meter Pole Charge.....\$150.00
When a customer requests that the Cooperative furnish a meter pole to be used on the customer's premises, a charge of \$150.00 will be collected in addition to the other required fees and charges.

9. Moving Pole Charge.....actual cost
The exception to this portion of the policy is that if moving the pole will be beneficial to the Cooperative.

10. Temporary Service Pole.....\$25.00
When a customer requests that the Cooperative furnish a temporary service pole, a \$25.00 service charge will be collected plus \$15.00 per month or portion of a month used will be billed. This charge is in addition to the monthly rate base and kWh usage charge.

11. Handling Charge on Returned Checks.....\$20.00
When it becomes necessary to notify a customer that a check issued to this Cooperative has been returned unhonored for any cause by the bank on which it was drawn, the consumer will be charged, in addition to the amount of the returned check, a \$20.00 handling charge. The Corporation will not accept checks for payment from a customer or a customer's agent for a period of one year after receiving two returned checks. When a check from a customer or a customer's agent is not accepted due to previously dishonored checks, the Corporation will accept checks for payment from another customer whose payment record is acceptable.

12. Unauthorized Reconnection or Tampering.....\$225.60
Any service found improperly connected or reconnected, or discovery of any tampering with the meter or other service equipment owned by the Corporation or the use of any other means whereby electric current is not properly recorded on the meter shall result in the service being promptly disconnected. When a service is found to have been improperly connected, reconnected, or tampered with, the person or persons in whose name the electrical service is listed will be held responsible. Service will be restored when all electrical bills, damage to equipment (if applicable), estimated cost of electricity used from the time illegal connection occurred, and any other actual costs involved in restoring electricity to the illegally connected or disconnected service are paid. If improper connection or disconnection occurs the second time, the customer, in addition to the above conditions, may be required to appear before the Board of Directors for their review and action. The Corporation does not waive any rights as to prosecution in such cases as may be provided by state law.

13. Arrangement Fee.....\$10.00
A fee will be charged for requested arrangements or extensions of payments due on accounts.
*Certain restrictions apply.

14. Temporary Connects - Rentals, Clean-ups, etc.....\$50.00
A fee will be charged to connect service at a location for clean-up or other similar purpose. Two (2) days will be allowed and a connect and disconnect order will be generated. Fees are to be paid in advance. Customers may request service as usual by paying the deposit and kWh usage in lieu of the Temporary Connect Fee.

CENTRAL GEORGIA EMC ELECTRIC SERVICES

Overhead Construction

A. Primary Residence Individual Extension

An overhead line extension of up to 500 feet from an existing line or public road will be made to an individual primary residence with no contribution-in-aid-of-construction (CIAC). The applicant shall be responsible for CIAC beyond 500 feet. Any customer may be required to provide evidence of primary residence.

B. Non-Primary Residence Extension

An overhead line extension made to any service other than a primary residence will require a contribution-in-aid-of-construction (CIAC) unless the anticipated revenue justifies the expenditure for the line extension.

C. Temporary Loads

An advanced, non-refundable payment is required for the estimated cost to install and retire electrical facilities to serve temporary loads except for temporary service for permanent loads. An advanced, non-refundable payment of the cost of materials, labor, and overhead less the salvage value of materials is required for installing and retiring electrical facilities to serve a temporary load that cannot be served from existing facilities.

Underground Construction

A. Primary Residence - Individual Extension

1. Customers/members requesting an underground primary extension will pay \$3.00 per foot.
2. Customers/members requesting a service drop up to 100 feet will pay \$200.00. Rebates may be available for total electric or Energy Efficient homes.
3. A charge of \$2.00 per foot for service drops greater than 100 feet will be required.

B. Non-Primary Residence

1. Customers/members requesting an underground primary extension will pay \$5.00 per foot. No discounts are provided for total electric or Energy Efficient homes.
2. Customers/members requesting a service drop up to 100 feet will pay \$200.00.
3. A charge of \$2.00 per foot for service drops greater than 100 feet will be required.
4. This account may be treated as a primary residence if the anticipated revenue justifies the expenditure.

C. Underground Subdivisions

1. A CIAC charge of \$1100 per lot (\$550 per lot if total electric) applies for primary line extensions to developments with maximum average street frontage per lot of 100 feet. This charge includes a service drop up to 100 feet. A charge of \$2.00 per foot for service drops greater than 100 feet is required. This assumes that the primary conductor and transformers will be located close enough to transformers to confine service lengths within sound engineering practice.
2. For lots that are larger than an average of 100 feet and/or require the transformer to be located off the street, an additional \$3.00 per foot will be charged for the ditching required that exceeds the 100 feet allowed.

D. Rock Clause

Additional expenses incurred for rock or other obstructions will be added to the total underground charge at cost.

E. Underground Service Greater than 600 AMP

The customer will be responsible for the installation of the required services for underground service greater than 600 AMP single-phase or three-phase. This includes the conduit and conductors from the transformer spades to the main distribution panel.
